TOYOTA 1NZ VIOS | IGNITION CONTROL

CF043 to IGT1–IGT4 / editable reference schematic

* Small text: base resistors read as 8.2K; Q500/Q501/Q503 markings need checking against the original.

D1/D3/D4/D5: type unspecified. Cathode faces GND and anode faces the collector, following the image.

Transistor B/C/E terminals describe the drawn symbol, not physical package pin numbers.

Reference schematic only / No PCB footprints or simulation models selected.
